

Gas prices for first semester 2008

Figure 1: Gas prices for household consumers *

* 'Household consumers' refer to consumer band D2 (annual consumption between 20 and 200 GJ)

Figure 2: Gas prices for industrial consumers **

** 'Industrial consumers' refer to consumer band I3 (annual consumption between 10 000 and 100 000 GJ)

Table 1: Gas prices for household * and industrial ** consumers (in € per GJ)

* 'Household consumers' refer to consumer band D2 (annual consumption between 20 and 200 GJ)

Comments

Price data for the Netherlands, Germany and Italy (for industrial consumers) are provisional.

No price data for Denmark and Austria (for industrial consumers).

Due to the limited size of the gas markets, gas prices are not applicable for Greece, Cyprus, Malta and Finland (for household consumers).

EU averages:

EU-27 = weighted average for the following countries: Belgium (BE), Bulgaria (BG), Czech Republic (CZ), Denmark (DK), Germany (DE), Estonia (EE), Ireland (IE), Spain (ES), France (FR), Italy (IT), Latvia (LV), Lithuania (LT), Luxembourg (LU), Hungary (HU), Netherlands (NL), Austria (AT), Poland (PL), Portugal (PT), Romania (RO), Slovenia (SI), Slovakia (SK), Finland (FI), Sweden (SE) and the United Kingdom (UK);

EA-15 = weighted average for EuroArea countries: Belgium, Germany, Ireland, Spain, France, Italy, Luxembourg, Netherlands, Austria, Portugal, Slovenia and Finland.

Exchange rates:

Prices for the standard consumers are given in national currencies, PPS (Purchasing Power Standard, annual estimated value) and in euro (average exchange rate first semester 2008).

'-' = nil or not applicable

':' = not available

GJ = Gigajoule

Methodology

A new methodology for the collection of gas prices

The legal basis for the collection of industrial gas and electricity prices is defined by Council Directive 90/377/EEC. The collection of prices for household consumers is done on a voluntary agreement with the Member States.

Due to the liberalisation of the electricity market, the methodology that defines the collection of the electricity prices became outdated.

In June 2007, the Commission adopted a new methodology for these price collections.

The main changes that were introduced for the collection of price information for the second semester of 2007 include:

- Prices are to be reported as national figures.
- Prices are to be reported as an average of the last 6 months.
- Typical standard consumers are replaced by consumption bands.

Annual consumption (GJ)					
Industrial end-users	Lowest	Highest		Household end-users	Lowest Highest
Band I1		< 1 000		Band D1	< 20
Band I2	1 000	< 10 000		Band D2	20 < 200
Band I3	10 000	< 100 000		Band D3	≥ 200
Band I4	100 000	< 1 000 000			
Band I5	1 000 000	≤ 4 000 000
