

Parliamentary TA in Europe

Dr. Leonhard Hennen

*Institute of Technology Assessment and Systems Analysis,
Karlsruhe Institute of Technology (ITAS / KIT)
European Technology Assessment Group*

Technology Assessment

Assessment of possible (future) effects of new scientific and technological developments on human health, society, economy and the environment.

Values

Facts

TA:
Intermediate between
Science
and Politics

Why TA? – problems of policy making in the field of Science and Technology

- **Legitimisation:** lacking consensus on what is a socially acceptable application of technologies
- **Democratic inclusion:** growing demands of social groups (those afflicted) to be involved in decision making
- **Democratic Control of R&D:** parliaments are lacking access to relevant knowledge

Two models of Technology Assessment

The “Pre-TA”, positivistic (or technocratic) model of decision making:
Policy making is informed (guided) by Science to a one best solution of the problem at stake

Reflexive Modernization:

Cognitive uncertainties and normative ambiguities are unavoidable

TA as an answer to the crisis of the technocratic Model

Policy Analysis Model

Expand the scientific knowledge base of decision making by employing different scientific perspectives and disciplines

Take account of different values and interests

Deliberative Model

Expand the normative basis of decision making by involving different social perspectives, interests and values

Deliberate on best ways of problem solving

Main features of TA as Policy Advise

- **Comprehensiveness:** with regard to scientific perspectives and possible effects
- **Transparency:** with regard to values and assumptions, quality of data and knowledge
- **Inclusiveness:** with regard to social interests and perspectives

EPTA

European Parliamentary Technology Assessment

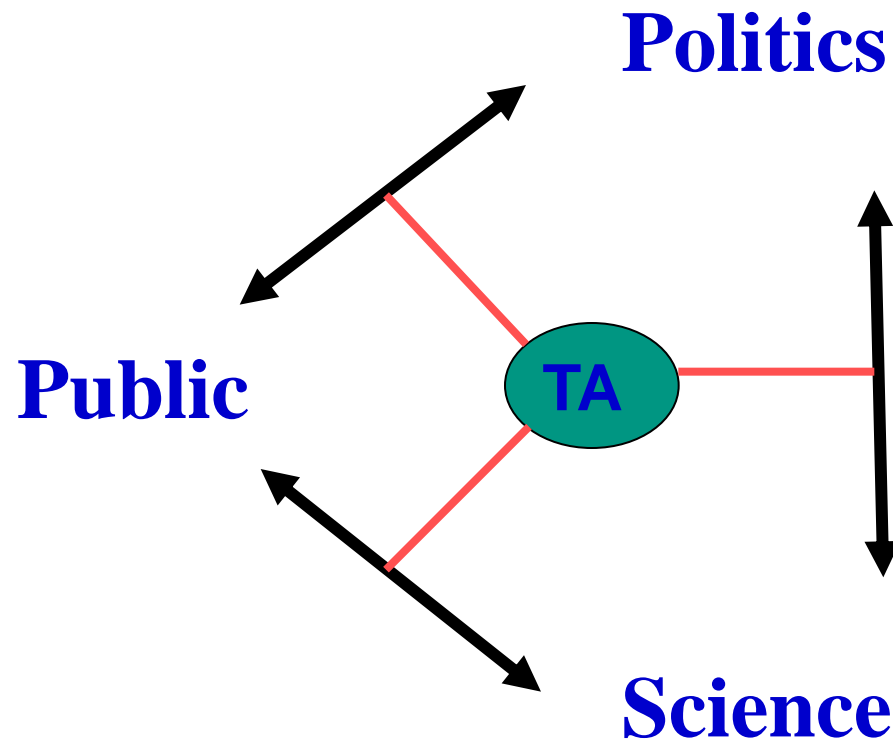

www.eptanetwork.org

- Founded in 1991
- Full-members: 14 Parliamentary TA institutes in Europe (3 associate members)
- Cooperative network, no formal legal entity (consortium)
- Continuous exchange on projects and methods

Activities:

- Annual conference and directors meeting
- Project data base
- Joint projects: Privacy, Biotechnology
- Cooperation in EU funded projects on TA concepts and methods (EUROPTA, TAMI)
- Bi-annually: Project managers meeting

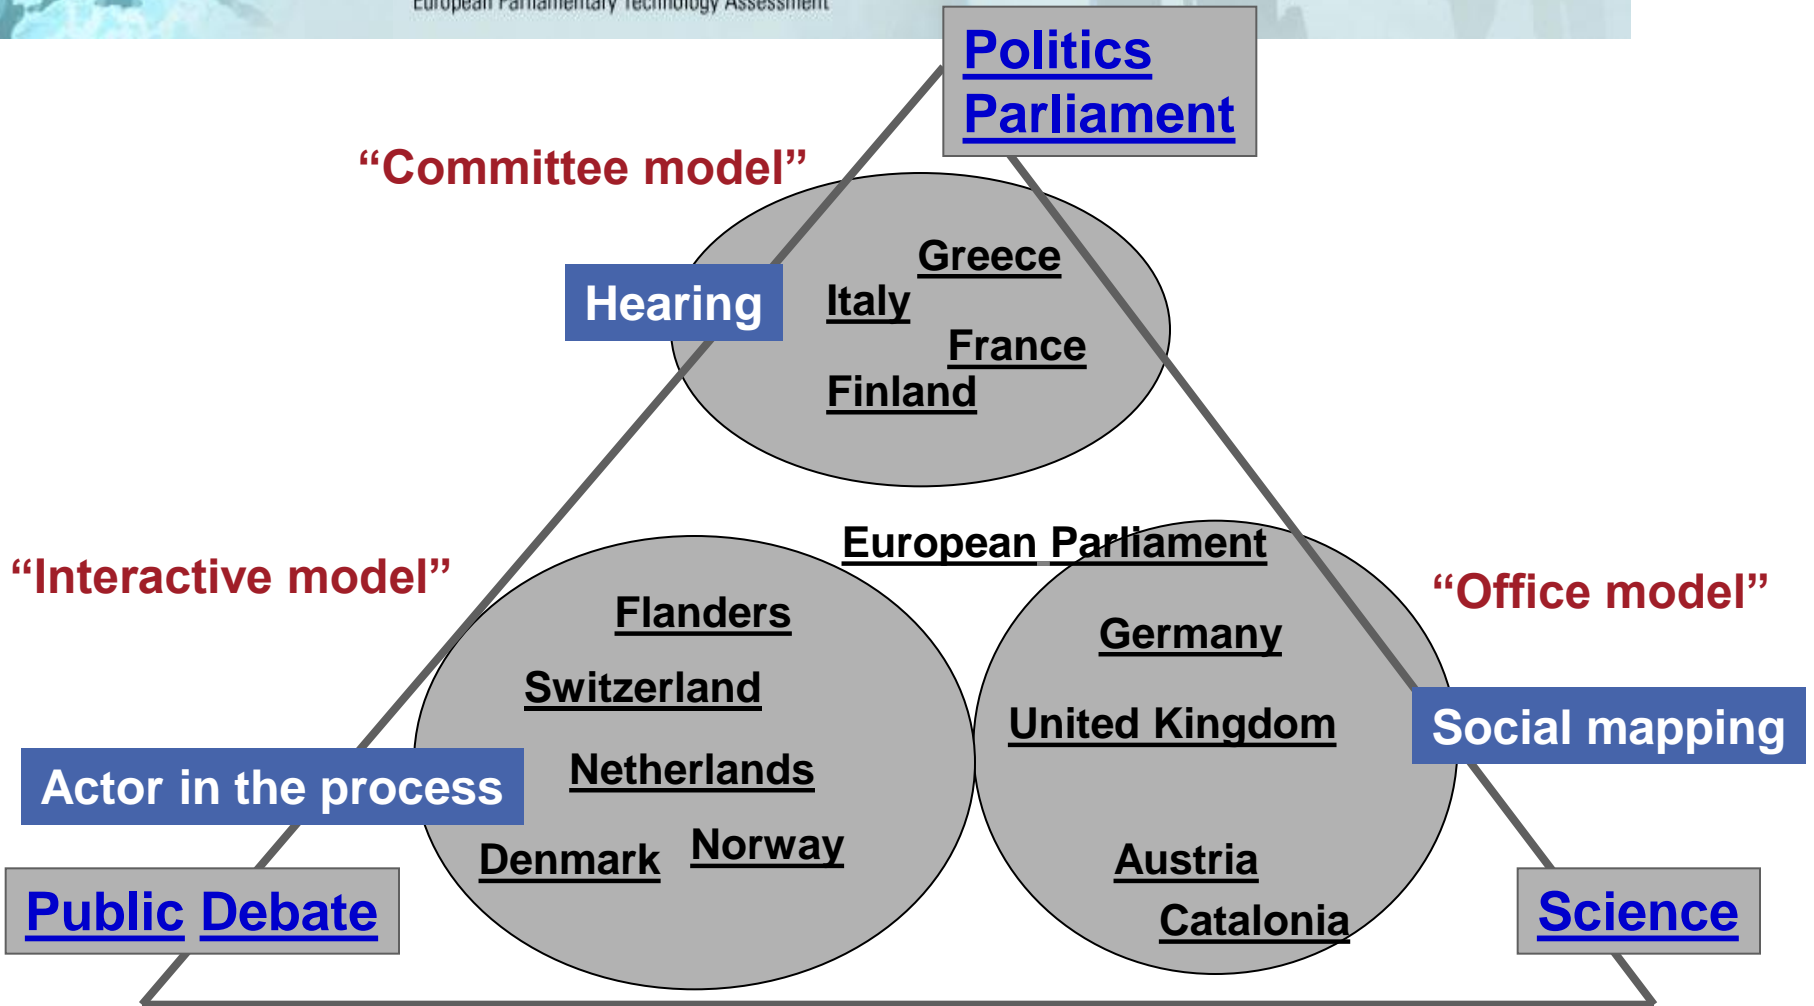

Intermediate Role of TA

EPTA

European Parliamentary Technology Assessment

Technology fields covered by EPTA projects 1990-2009

*Total of 587 projects covered by EPTA database:
www.eptanetwork.org*

Issue Dimensions covered by EPTA projects

Common features of institutional setting

- Clear public mandate and mission (no closed shop)
- Problem- and policy oriented (not academic) selection of subjects
- Close co-operation of science and politics – but clear separation of competences
- Involvement of scientific community and societal interests
- but institutional independence

Selection of TA methods

■ Citizen Consultation

- Consensus Conference
- Citizen Summit / WWViews
- Citizen hearing
- Interview Meeting
- Voting conference
- Citizen visioning processes
- Focus groups

■ Stakeholder involvement

- Future Search
- Scenario Workshop
- Perspective Workshop
- Ad hoc workshop design
- World café / Café seminar

■ Expert Analysis

- Scientific research
- Work Groups
- Structured Brainstorms
- Modelling/scenarios
- Conferences & Workshops

■ Advisory function

- Parliamentary Hearings
- Future Panel
- Early Warning; Briefings

■ Public Debate

- Debate meetings
- Debate Products/ www
- Web 2.0

Contribution of TA to the Policy Process

Impact Dimension Issue Dimension Dimension	Raising Knowledge	Forming Attitudes/ Opinions	Initialising Actions
Techn. – Scientific Aspects	Scientific Assessment (1) Tech. Options assessed and made visible (2) Overview on consequences	Agenda Setting (6) Agenda setting in political debate (7) Stimulating Public debate (8) Visions introduced	Reframing of Debate (15) Action to further scrutinise issue (16) New orientation in policies established
Societal Aspects	Social Mapping (3) Structure of conflicts made transparent	Mediation (9) Self-reflection among actors (10) Blockade running (11) Bridge Building	New Decision Making Processes (17) New ways of governance introduced (18) Init. To intensify public debate
Policy Aspects	Policy Analysis (4) Policy objectives explored (5) Existing policies assessed	Re-Structuring Policy Debate (12) Compreh. in debates increased (13) Policies evaluated (14) Democratic Legitimation	Decision Taken (19) Policy alternatives filtered (20) Innovations implemented (21) New legislation

Thank you very much!
